Concrete Crushers X-Series

*...with NPK's Exclusive Hydraulic
INTENSIFIER SYSTEM
providing maximum crushing/cutting force
and industry-leading cycle times!*

- Well Suited for Smaller Carriers that Can Fit into Tight Spaces, Ideal for Internal Demolition
- Favorable Power-to-Weight Ratio with Slim and Compact Design
- Simultaneously Closing Jaws with Replaceable Carbide Teeth and Integrated Cutting Blades
- Fast Opening and Closing Cycles with Constant Force
- Full 360° Mechanical or Hydraulic Rotation Available
- Hydraulic Components and Hoses Protected Inside the Crusher's Frame
- Comprehensive Dealer Network Providing Sales, Parts and Service, and Backed by the Industry's Best Support!

NPK ATTACHMENTS...designed, built and backed by NPK.

*Working weight includes mounting bracket. **Cycle time is full stroke, without material, at maximum oil flow. Specifications subject to change without notice.

Compact and Slim Design

The X-Series Concrete Crushers are well suited for smaller carriers that can fit into tight spaces, making them ideal for internal demolition and other specialty applications.

Concentrated forces fracture the concrete, allowing reinforcement wire/steel to be exposed and then efficiently cut with the cutter blades located in the throat of the unit.

3 Rotation Options Available:

- **Mechanical/Free: "AFR" Models**
Equipped with a free mechanical style rotation bearing with heavy-duty spring-loaded stops. The free rotation bearing allows the crusher to self-position on material and rotate throughout the bite, eliminating twist on the machine arm.
- **Full Hydraulic: "AR" Models**
Equipped with a full hydraulic rotation system which requires a secondary hydraulic circuit.
- **Electro-Hydraulic: "AREH" Models**
Equipped with an electro-hydraulic selector valve allowing operation for both jaw and rotation off of a single auxiliary circuit and 12V power connection.

NPK's exclusive cylinder/intensifier design improves crushing/cutting power to handle the toughest jobs

Integral hydraulic intensifier system boosts power by amplifying cylinder pressure, reducing cycle time, improving productivity and providing greater power-to-weight ratio.

Replaceable Teeth

The X-Series Concrete Crushers are equipped with replaceable carbide teeth, allowing for longer service life and quick replacement in the field, thus increasing uptime.

Additionally, the integrated cutting blades can be flipped, allowing for both sides to be utilized; they can also be shimmed as wear occurs, extending the life of the cutting blades before having to replace them.
