

Dust Suppression

Reduce Dust with NPK's Add-On Water-Ready Kit

Option Available for PH-1, PH-2, PH-3
and PH-4 Hydraulic Hammers with
Enclosed Bracket

Water Spray Nozzle Integrated Into
Bracket Provides Wide Spray Angle for
Maximum Coverage

Ready to be Connected to Water
Supply (Water Reservoir and Pump Not
Included)

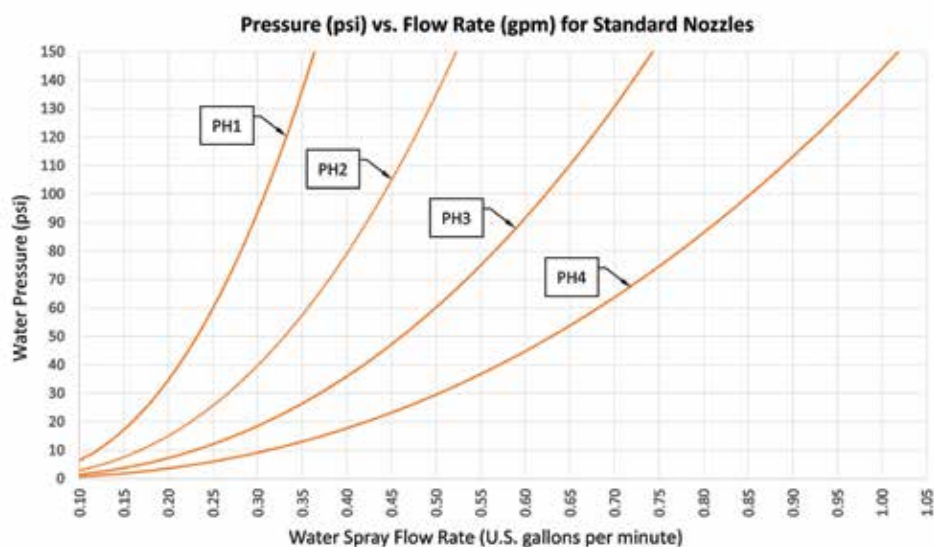

NPK ATTACHMENTS DESIGNED, BUILT & BACKED BY NPK

Dust Suppression

Ready to be Connected to
Water Supply

NPK offers an add-on water-ready kit that is available for PH Series hammer models PH-1, PH-2, PH-3 and PH-4 with Enclosed Brackets.

This system reduces dust at the point of impact in concrete, rock, or whatever surface is being broken, improving visibility at the breaking site and in the surrounding area. Silica dust can be significantly reduced through the use of wet methods, thus reducing concentrations in breathing air and workers' exposure. NPK's water-ready hammers help to make working environments safer and to meet OSHA silica dust reduction regulations.

Wide spray angle for maximum coverage

An integrated water spray nozzle eliminates the need for manual spraying.

Located in the bracket of the hammer, the nozzle is aimed at the point where the hammer's tool makes contact with the breaking area. This, combined with a wide spray angle, provides maximum dust suppression coverage. It helps to control airborne dust, including respirable crystalline silica, at the point of impact in two ways. Upon breaking, particles are sprayed with mist; this mist combines with particles which increases weight and leads them to drop back to the ground. Additionally, the mist douses the breaking area before impact, thus reducing the amount of dust or silica generated and hinders dust from rising back into the tool bushing.

Hammers configured with this Water-Ready Kit option at time of order come complete and ready to be connected to an appropriate water supply.
(NOTE: Water reservoir and pump not included.)

Add-On Water Ready Kit Option is Available for the Following PH Series Hammer Models

NPK Hammers with Enclosed Brackets	Recommended Carrier Weight (metric tons)	Impact Energy Class (ft lb)
PH-1	1.8-3.5	350
PH-2, PH2-S	2.7-5	500
PH-3	3.6-7.3	750
PH-4	5.5-8	1,300

Each product sold by NPK is subject to an express written warranty. NPK makes no other warranty, express or implied, including any warranty of merchantability or fitness for any particular purpose. NPK is not liable for any incidental or consequential damages.
