

## Announcing the New President and Director of NPK Construction Equipment, Mr. Dan Tyrrell

- The Board of Directors appointed Dan Tyrrell as its new Director and President of NPK Construction Equipment, Inc. Dan is succeeding Larry Masek who is retiring after a successful 11 year tenure. Dan joined NPK in 1990 as a Project Engineer and spent his first year working in Japan at Nippon Pneumatic Mfg. Co., LTD in their Research and Development Department.
- The time spent in Japan enabled Dan to develop life long friendships which would later help facilitate all aspects of business between Nippon Pneumatic and NPKCE. When he returned from Japan, Dan was appointed Chief Engineer and General Manager for NPK CE and General Manager of NPK Research, Inc. in Walton Hills, Ohio, a sister company formed for new product development.
- Since 2000, Dan has been Vice president of Engineering. While Vice President Dan was instrumental in the construction of a new test facility in the Walton Hills location. He also led a team which implemented a new company-wide business system. His initiative in this area exposed him to unique constraints and requirements of each department. The willingness to take on new challenges coupled with a team-player attitude, enabled Dan to effectively implement new more efficient practices. A manager with proven ability to encourage the best performance out of his employees has made Dan the unanimous choice.
- Dan resides in Ravenna, Ohio with his beautiful wife, Tonya, and their 6 children. For fun, Dan loves to spend time in his garden, go bow hunting and fishing. He has coached youth baseball for almost 15 years and teaches children at his local church.
