NPK Construction Equipment, Inc. introduces the latest edition to our newest product line. The BB818 Breaker Bucket, which is compatible with carriers in the 8 to 18 ton range joins the BB511, compatible with carriers in the 5 to 11 ton range. The NPK Breaker Bucket, a single piece of equipment that gives you both the impact force of the NPK Hammer and the digging power of a conventional bucket. As well as, several easily interchangeable attachments that increase the Breaker Bucket's versatility, including standard chisel pins, a breaker blade, tamper plate and asphalt/frost blade. Easily accessible compressed air connections also make it useful for working under water. The Breaker Bucket has been designed with the Municipal and Utilities market in mind providing improved safety while reducing injuries in the workforce. A backhoe or mini excavator equipped with a Breaker Bucket can do all the work required for a waterline repair or the excavation for utilities, eliminating the need for separate hammer, compactor and even a quick attach system.

NPK Construction Equipment, Inc. was established in 1985 to serve the needs of the construction, demolition and mining industries. NPK quickly built an extensive and competent dealer network as well as an engineering and design staff with years of industry experience. A serious commitment to product support enables NPK to maintain a high level of customer satisfaction. A knowledgeable service staff continually provides educational training and technical assistance for NPK products and our customer service group coordinates resources for efficient and optimum distribution. NPK is a fully developed designer, manufacturer, assembler, importer, exporter and distributor of the finest, most reliable attachments available. NPK has developed the industry's most comprehensive line of hydraulic hammers and also markets a complete line of compactor/drivers, concrete crushers, material processors, grapples, pedestal breaker systems, quick attach coupler systems and the innovative breaker bucket, as well as, an extensive line of both hydraulic attachment kits and mounting kits designed to fit your carrier. The "NPK" trademark has become a symbol for quality products worldwide.
